

Khan's Tutorial Awards Apple iPad2 to High Scorer of 2010 SHSAT Exam

New York, New York. April, 2011- Khan's Tutorial presented an Apple iPad2 to the highest scorer from the 2010 SHSAT exam, Mohammed Alam, at their Annual Awards Ceremony. Last year over 135 students from

Khan's Tutorial were accepted to the New York City Specialized High Schools. Mohammed, who received a 657 on the SHSAT exam will be attending the nationally renowned, Stuyvesant High School this fall, entering their freshman class. Last year's cut off score for eligibility at Stuyvesant High School was approximately 575; Mohammed surpassed the cut off by a whopping 82 points.

Mohammed, who had been attending Khan's Tutorial's SHSAT prep classes since Spring 2010 did not expect to receive the wildly popular tablet, made by Apple Inc. which has already sold over 8 million units of its first and second generation iPads worldwide. "This was a total surprise! I had no idea about the free iPad2, and wanted to scream when I heard the news" says Mohammed.

Chief Operating Officer, Dr. Ivan Khan, who presented Mohammed with the gift explains, "We are thrilled with Mohammed's score and wanted to properly recognize his hard work. There are thousands of educational uses for the iPad2, and we plan to continue this award for next year also." Technology industry leaders agree, "The iPad is transforming education. Learning is becoming personal, interactive and fun; blurring the fine line between work and play" explains Sheehan Alam (no relation), who developed and sold an iPhone application to StockTwits in 2009.

Last year, Khan's Tutorial awarded their highest scorer Farhan Yusuf, who is currently attending Stuyvesant High School with an Apple iPod Touch for his remarkable achievements on the 2009 exam.
